

**IN THE SPECIFICATION**

On Pages 39-49, please remove the footnote for Table 3, “\*Weight percent based on fully catalyzed and water reduced sprayable paint, such that 1000g of mill base material is mixed with 400g of Deft epoxy resin/catalysts/activator and 1273g of water added in three portions with stirring.”

On Page 54, please remove footnotes “\*\*” and “\*\*\*” for Table 7: “\*\*Weight percent of inhibitor and pigment is based on the total weight percent of fully catalyzed and sprayable topcoat.” and “\*\*\*Weight percent of extender is based on the total weight percent of fully catalyzed and sprayable topcoat. Lo-Vel HSF, available from PPG Industries, having offices in Pittsburgh, PA.”

The removal of these footnotes corrects technical inaccuracies in reporting the weight percent of the components in the tables. The definition of weight percent found in paragraph [0022] applies to Tables 3 and Table 7, which is inconsistent with the misplaced footnotes. No new matter has been added with this amendment.
